Our

Offers

Dear parents,

Many questions arise during pregnancy. We have created this offer to help ensure that you can start your everyday life well-informed and well-cared for, both during the pregnancy and after the birth.

We offer you our help

- Do you have any questions about applications or do you need support in dealing with authorities?
- Do you have any questions about your health during the pregnancy?
- Do you have any questions regarding your baby's health and development?
- Do you need information about childbirth courses?
- Would you like to have contact with other mothers and fathers?
- Are you new in Berlin and would like to find out about offers for families in your area?
- Do you need support for yourself and your baby/babies in everyday life?
- Are you a single parent and facing special challenges?
- Is the joyful anticipation of your baby being weighed down by worries?
- Are you looking for a midwife for your post-partum care?

We provide advice to give you helpful support.

We inform you about important offers.

We arrange initial contacts.

Monitoring

Every three to four weeks and then four months after the birth, we will contact you and provide further help if needed.

The Team

We are educators and look after the families under the direction of Prof. Dr. Michael Abou-Dakn, Chief Physician at the Clinic for Gynaecology and Obstetrics. The consultations take place in German.

A project coordinator takes over the organisation and quality assurance. The project is continually evaluated.
